FULL STACK WEB AND APP DEVELOPER

TECHNICAL SKILLS

- HTML / CSS
- JavaScript
- Git / Github
- Typescript
- Tailwind CSS
- Bootstrap
- Material UI
- ShadCN UI
- React JS
- Next JS
- React Native
- Redux
- Node JS
- Express JS
- MongoDB
- Firebase

PROJECTS

AlMaram Al Faneyah

- Developed and deployed the website for Al Maram Al Faniyah (AMF), a Saudi-based company specializing in industrial equipment, electrical supplies, and contracting services. The project was built using Next.js (Full Stack) and MongoDB, with deployment on a VPS server. The goal was to establish AMF's digital presence, highlight their offerings, and attract potential clients through a responsive, SEO-friendly platform. I was responsible for both frontend and backend development, implementing server-side rendering, dynamic content handling, and performance optimizations. The site features a clean UI, mobile responsiveness, and secure VPS deployment with proper domain and SSL setup.
- Live Demo: <https://amf-sa.com/>

Webcraft Solution Ltd

- Built the website for Webcraft Solution Limited, a modern digital agency offering web development, design, and branding services. The project was developed using Next.js, styled with Tailwind CSS, and enhanced with ShadCN UI components for a clean, professional design system. To create a dynamic and engaging user experience, I implemented smooth animations using GSAP and Framer Motion, showcasing advanced frontend capabilities. The result is a high-performance, fully responsive website with a polished UI/UX tailored to reflect the agency's creative and technical strengths.
- Live Demo: <https://webcraft.pk/>

PCFC Mobile App

- Developed a mobile application for Port Customs Free Zone Corporation (PCFC) using React Native, enabling seamless access to customs, port, and free zone services for users on both iOS and Android platforms. The app was designed to enhance operational efficiency, allowing users to track shipments, manage customs procedures, and access real-time port data. Additionally, the app provides comprehensive employee management features, including task assignments, attendance tracking, leave management, and event scheduling. Leveraging React Native's cross-platform capabilities, I ensured smooth functionality, optimized performance, and an intuitive, responsive user interface for both administrators and employees.

WORK EXPERIENCE

Stem Solution Ltd — Associate Software Engineer

2024 – Present

- Focused on developing scalable mobile and web applications, prioritizing performance, reliability, and seamless user experience.
- Implemented new features and enhanced app functionality using modern JavaScript frameworks and best practices for mobile and web app development.
- Collaborated with cross-functional teams to deliver innovative app solutions, ensuring user-friendly interfaces and optimized performance across devices.

EDUCATION

Bachelor Degree in Computer Science | University of Education

2023 - 2027

- Developed problem-solving skills and hands-on experience with projects.
- Gained foundational knowledge in programming, databases, and web development.

FSc. Pre-Engineering | Govt. College of Science

2020 - 2022

- Completed FSc. Pre-Engineering at Govt. College of Science.

SOFT SKILLS

- **Team Collaboration** – working effectively with designers, backend/frontend teams, or clients.
- **Time Management** – balancing multiple projects and meeting deadlines.
- **Mentorship** – helping juniors or teammates with technical issues.
